The mining industry produces the metals and minerals that are essential to economic prosperity and a better quality of life. While currency and jewelry often first come to mind when thinking of precious metals, in reality gold and silver have numerous applications in everyday life. In fact, nearly everything we depend on is either made from metals and minerals or relies on metals and minerals for its production.

We are professionally engaged in Investment Account Management, futures trading, forex, Gold mining, and have a large experience of the investment Industry.

We are an expert in this field
Liquid Wealth Investment is an investment management company. We are run by a team of trading experts who generate profits by buying and selling currencies, stocks, options and commodities on the foreign exchange market.

We employ a variety of trading techniques to achieve the set goals for the client.
We are very proud to state that our clientele base cuts across financial institutions, individuals, and several other corporate institutions. We are determined to provide the best service to our clients and deliver a very lucrative source of income to our investors. From our founding, Liquid Wealth Investment has sought to align our interests with those of our investors, investment partners, and employees. This has allowed us to proudly build and maintain a culture of ethical behavior, transparency, and social responsibility in both our investments and our operations.

The main objective of Liquid Wealth Investment team is to get the highest profits possible from trading on the foreign exchange (Forex), Cryptocurrency exchange markets and from ICO's startups. If you are dreaming of earning on the powerful potential of Forex and Cryptocurrency trading, get on Liquid Wealth Investment – your investment opportunity which will carry you to more wealth and prosperity. Our team of highly professional experts works hard to ensure respectable income to each of our investors.

Our financial team also includes specialists who are experts in evaluating new private businesses called start-ups which have most chances to grow into large-scale and highly profitable enterprises. The idea is very simple: every business needs starting capital to go through bureaucratic formalities, rent premises, purchase equipment and other assets, hire employees and so on. As a rule, start-ups don't have sufficient funds to afford everything they need for effective activity. Banks are quite prudent to "newbies", so it is often very difficult to borrow as much as necessary from banks.

Liquid Wealth Investment platform intends to stay in business for a long time and do its best to ensure high revenue on investor's deposits. The more money we collect, the higher the return. That's why Liquid Wealth Investment platform had started attracting small investments starting from only $100. Our experts had examined and analyzed the relevant investment markets and developed a highly efficient trading strategy. Investors can choose from a variety of investment packages to invest their funds for different periods of time and receive the best revenue at low risks. Please find more information on investment terms in your personal account. In addition to favorable investment proposal we also offer fair and transparent conditions of the affiliate program. You have the opportunity to start a business of your own and earn additional money by just sharing the word of our Company and demonstrating its potential to others. Our referral rewards program offers earning 7% from deposits made by your referrals.
Liquid Wealth Investment platform is a safe place to keep and increase your

money.

DEDICATED EXPERTS

We are investment experts with an explicit focus on protection and security. We understand that every customer has different circumstances and objectives and it's these differences that influence our diverse range of products. multiple boutique fund managers through an institutional platform backed by a premier listed financial services company.

In recent years the investment industry, and in turn investors, have introduced a new gauge: Liquid Wealth Investment – Environment, Social and Governance – as a supplement to traditional financial gauges.

Sustainable investing

Why does it matter?

Liquid Wealth Investment changes are happening faster than ever, reshaping how people live and invest. We believe that Liquid Wealth Investment factors are going increasingly mainstream and can be used to drive investment outperformance.

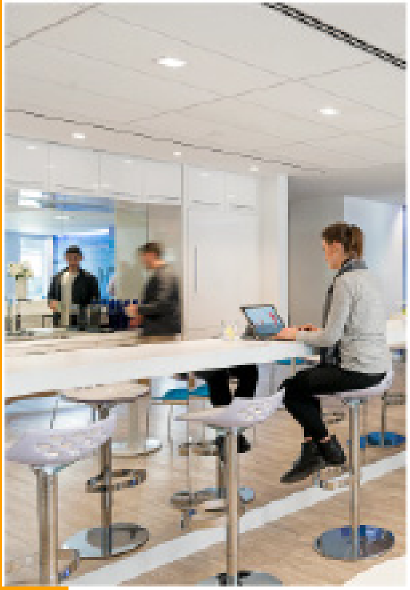
Investing for a sustainable future

The era of green bonds has arrived. We are seeing the increasing use of bond markets to raise capital to fund the low-carbon economy, especially from the issuance of ‘green bonds’.

While many in the fixed income market are grappling with green bonds, others are working out how best to incorporate broader environmental, social and governance Liquid Wealth Investment strategies into their portfolios, a task rapidly growing in importance.

Why does it matter?
Liquid Wealth Investment changes are happening faster than ever, reshaping how people live and invest. We believe that Liquid Wealth Investment factors are going increasingly mainstream and can be used to drive investment outperformance.

Making the first step right is crucial to the long road of investments.



Of the five steps, the first is to assess your risk tolerance and decide the most suitable asset allocation for yourself.
Different people have different attitudes towards investment. Some are not willing to take any risks or withstand losses, and therefore would rather forgo potentially higher returns. Some are willing to take some risks but tend to avoid huge volatility. Some are willing to take risks in exchange for returns that outperform the markets.

How to gauge one's risk tolerance? Look at your investment horizon. Put it simply, the longer your investment life, the higher the risk you can take because you can afford the time to last a cycle, which helps smooth out short-term volatility. For instance, a young person just starts working, who is still far from retirement, can take more risk.

Sustainable investing
On the contrary, the shorter the investment period, the lower the risk one can take. Assuming you are going to retire next year, and not receiving any regular income, you just do not have the time to recover all losses if your investments take a nosedive all of a

sudden.

Besides, your risk tolerance is dependent on your life goals. Ask yourself if you need to set aside funds for your children's education? Are you going to buy a property in the near future? These factors will have an impact on your cash flow. After all, we all need to reserve some cash at all times just in case there are emergencies.

Balancing risk and return is the key to long-term investment isn't it perfect to have an investment tool that always tops the performance league, and investors can stay worry-free just by holding it? The truth is that there are ups and downs in all economic cycles and the markets are capricious. Even investment experts find it hard to predict the performances of all asset classes.

Based on historical data, the same asset can perform drastically differently during different investment cycles. The best-performing asset in 2017 can turn out to be the worst laggard in 2018. That suggests no particular asset can be an all-time winner. Investors should therefore avoid putting all eggs in one basket but allocate assets across different sectors and geographies. That could help diversify the risk of an investment portfolio, and capture investment opportunities at different times for more stable returns in the medium- to long-term.

To make diversification works, an investment portfolio should include assets that are complementary, that tend to react differently to the same macro condition. More precisely, some negative elements in the market might cause an asset to decline sharply, but pose little threats to another. In the world of investment, such pairs are called lowly-correlated assets. They can effectively balance the risk and return of an investment portfolio.

Portfolio management

Rebalance your portfolio: restore the original allocation

In the investing journey, investors should start off by constructing a portfolio that accommodates their investment objectives and risk profiles. However, setting up the initial asset allocation is merely a starting point. It is equally important to regularly rebalance the portfolio to ensure the asset weightings are consistent. Overlooking the need to rebalance the portfolio can prevent investors from achieving their long-term investment goals.

Market changes shift portfolio away from initial objective

In an investment portfolio, the relative weights of different asset classes may change due to market fluctuations, which lead to a shifted asset allocation that deviates from the original target. In this case, rebalancing the portfolio will mean restoring the weightings of portfolio assets to the original designed levels.

Hedge Funds and Private Equity

The Company’s investments in externally managed private equity funds and hedge funds, as well as private equity direct and co-investments.

The portfolio seeks to maximize risk-adjusted returns and diversify exposure by industry and geography, while giving the Company a global view of the alternative investment landscape.
With our archiving capacities and constant education of our staff, monitoring ever changing regulations and global finance requirements we are sure we can be a valuable ally in your expansion.

Investment Management

In 2015, the Company established the Investment Management division formerly known as Principal Investments and began its evolution into a leader in alternative investing. Investment Management leverages the Group’s expertise, network, and financial strength to seek attractive risk-adjusted investment opportunities across global markets and sectors.

This includes the Company’s internally managed strategies, corporate holdings and cash. We actively manage all sub-portfolios and carefully use derivatives and hedging to increase returns and manage risk.

Hit your investment targets with the right approach

Once you have identified your investment targets, you can put your cash into different asset classes and construct a portfolio based on your risk tolerance. The idea of asset allocation is to include equities, bonds and other investment tools in a basket. Since different investment vehicles come with different risk-return profiles, asset allocation is never easy.

Generally, the higher the potential return of an asset class, the higher the risks it carries.
